

**NOTICE OF INTENT TO ADOPT A MITIGATED NEGATIVE DECLARATION
ALAMEDA COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT**

San Leandro Creek Hazardous Tree Management Project

The Alameda County Flood Control and Water Conservation District (District) proposes to prune 15 trees that otherwise would have the potential to fail or might have large limbs break and fall, coppice 2 native trees that are in poor condition or at high risk of failing to allow them to re-sprout, and remove 17 hazardous trees that are in danger of falling due to decay, structural defects, and/or potential to fall in the wind. Native trees, saplings and habitat features retained on the project sites will be protected during these activities and debris will be recycled. The project is located at three sites within an approximately one-mile stretch of San Leandro Creek between Woodland Avenue and Macarthur Boulevard in the City of San Leandro on Alameda County Flood Control and Water Conservation District property. Site 1 is at Huff Avenue, on both banks of the Creek, Site 2 is at Cary Drive, on both banks of the Creek, and Site 3 is at St. Mary Avenue, on the north side of the Creek.

The Mitigated Negative Declaration (MND) and the Initial Study upon which it is based are available for review at the Alameda County Public Works Agency offices 399 Elmhurst Street Hayward, CA 94544 and at the PWA Website: <http://www.acgov.org/pwa>. Copies of the Initial Study are also available at the San Leandro Main Library, 300 Estudillo Avenue, San Leandro, CA 94577. The document concludes that the project would not result in any significant adverse impacts. If you disagree, please send your reasons with your written comments to the address below. The Alameda County Board of Supervisors will consider the MND and all comments received prior to its adoption or approval of the project. Written comments will be accepted during the public review period from May 11, 2011 to May 31, 2011 at 9:00 AM, or e-mail comments to jimb@acpwa.org.
